## The All-on-4/Profile Prosthesis Restoration ▾

Over the past several years, we have been giving comprehensive educational seminars on fixed restorative treatment of the fully edentulous arch using the All-on-4 restoration. Below are several examples of cases we have treated. **Each of these cases was completed by a restorative dentist who had not previously restored one of these cases.** These patients would otherwise have been lost to the corporate advertisers. We have conducted courses for over 100 restorative dentists on cases such as these. Our courses include discussion on case identification and treatment planning, as well as instruction on the step by step details of the restorative and laboratory phase of treatment.

**Should you desire to learn how to treat these types of cases, we are available.**

**Please contact us to find out more information on the next available seminar.**

Please also visit our website [www.midwestdentalimplantology.com](http://www.midwestdentalimplantology.com) for a more complete view of cases we have treated.
